

## Concealed Valve for Wall-mounted faucet - C4

Collection: PLATANI

Model: HTD09D-CO-PL-C4-00-WL

Our Premium Wall-Mounted Concealed Valve is the essential hidden component for wall-mounted bathroom faucets. Designed to be installed behind the wall, this valve ensures a clean, minimalist look by keeping plumbing discreetly out of sight. Built for durability and precision, it provides effortless control over water flow and temperature, delivering reliable performance for luxury bathrooms.

- **Sleek and Minimalist:** Achieve a streamlined bathroom design by keeping plumbing components hidden.
- **Enhanced User Experience:** Enjoy seamless control over water temperature and flow, adding comfort to everyday use.
- **Long-Lasting Reliability:** The durable materials provide peace of mind with reduced need for maintenance or replacement.
- **Versatile Compatibility:** Perfect for homeowners and designers looking to create luxury, modern bathroom spaces.
- **Clutter-Free Aesthetic:** Ideal for those aiming for a clean, polished bathroom look with no visible hardware.

### BENEFITS

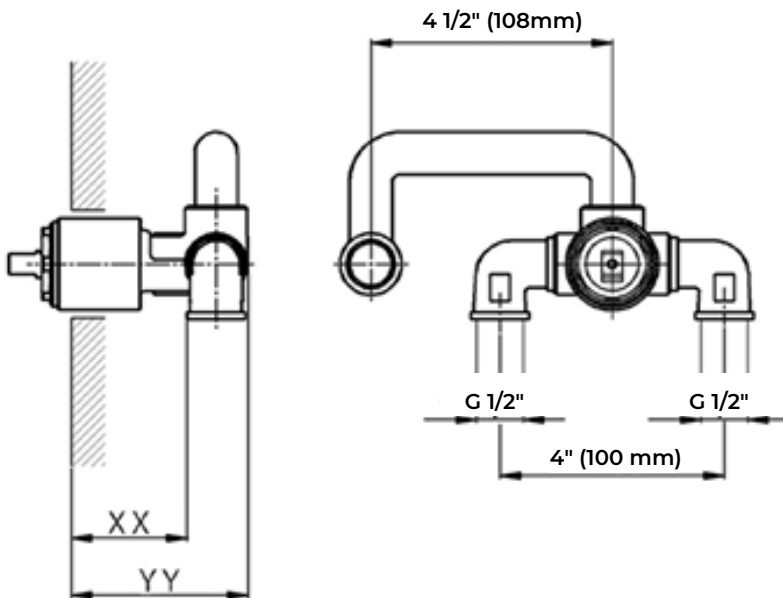

- **Concealed Design:** Installed behind the wall for a sleek, modern appearance.
- **Precision Control:** Offers smooth and accurate adjustment of water flow and temperature.
- **Durable Construction:** Made with high-quality materials to ensure long-lasting, leak-proof performance.
- **Easy Installation:** Compatible with standard plumbing systems for hassle-free setup.
